Preface

PCBS has sought, since it was established, to build a system of Palestinian official statistics based on the needs of the society, and in line with the recommendations, including full membership in the international statistical community. PCBS has adopted the principle of progression within the Palestinian priorities of the current phase as basis for advancing towards completing the statistical system. PCBS has accomplished many statistical activities using primary sources including censuses, field surveys, as well as compiling statistics from secondary sources such as the administrative records, through cooperation with the public and private sectors' institutions.

We are pleased to present Jenin Governorate Statistical Yearbook (1) to provide continuous time series that allows reviewing the general directions in the different areas through a comprehensive statistical reference that covers most population, social, economic, and geographic areas.

This yearbook is one of the most important and comprehensive official statistical references about Jenin governorate. It provides official statistics about the different areas of life in the governorate.

We hope that we have managed to bridge another information gap and have contributed to provide one of the key references of the official Palestinian statistics to serve the development process and the decision makers to make decisions and plans that are based on professional and scientific basis at the national and governorate level.
