Introduction

Construction is one of the major economic activities in the Palestinian economy. It contributes substantially to the Gross Domestic Product, comprises a large share of employees, and directly influences several other economic activities. Building construction in particular represents one of the major construction activities.

It has been necessary for PCBS to establish a statistical database that covers several aspects of construction activities in order to accommodate the different needs of users. The annual economic surveys series conducted by PCBS since 1994 includes a survey of construction contractors. PCBS has also conducted an annual Existing Buildings Survey starting from the reference year 1996.

This report is divided into three chapters: chapter one presents the main findings of the project, while chapter two discusses the quality and methodology of the field work in terms of the questionnaire, field work operations, coverage, data processing and tabulation. Finally, chapter three explains the main concepts and definitions used in the report with brief descriptions.

PCBS is pleased to present this report on Building License Statistics, which provides statistical data on the size and characteristics of licensed buildings in the Palestinian Territory for the Third quarter of 2012.

* The data exclude those parts of Jerusalem annexed by Israel in 1967.

** Excluding boundary wall licenses

The total number of building licenses issued in the third quarter of 2012 decreased by 18.8% compared with the second quarter of 2012. The total number of building licenses issued was increased by 3.6% in the third quarter of 2012 compared to the third quarter of 2011.

1.2 Number of Licenses by Governorate: Nablus recorded the highest number of building licenses 366 issued for residential buildings during the third quarter of 2012, while Hebron governorate was second with 286 licenses. The highest number of licenses for non-residential buildings 64 was in Nablus governorate.

The following table shows the number of building licenses issued in the Palestinian Territory in the third quarter of 2012 compared to the second quarter of 2012:

Chapter Two

Methodology and Data Quality

2.1 Objectives

This type of statistics provides information on the number of building licenses, the area of licensed buildings, and the number and area of licensed dwellings and stores, taking into consideration the following variables:

- Issuing authority
- Geographic location
- Status of the buildings to be licensed (new, existing, new or existing additions)
- Ownership of building (private, governmental, local authorities, cooperative, etc.)
- Utilization of the building (residential, non-residential: industrial, commercial, educational, etc.)
- Major external construction material (stone, concrete, block etc.).

2.2 Accuracy of Data

Statistical Errors:

The survey was implemented via a comprehensive census of all studied statistical units (licenses) and therefore, is free of statistical (sampling) errors.

Non-Statistical Errors:

Non-statistical errors are probable at all stages of the project during data collection or processing. In this survey, non-statistical errors are mostly referred to as data entry errors. To avoid errors and reduce their effects, great efforts were exerted to train data entry staff on the data entry program, which was tested before commencing the actual data entry process. The data entry program was prepared prior to data collection and a set of validation rules was applied to the program to check the consistency of data. Periodic data files were received by project managers to check the accuracy and consistency of data.

2.3 Comparison of Data

Comparison exercises were carried out with surveys of building licenses for the previous and corresponding quarters and the results reveal fluctuations with previous survey data.

2.4 Technical Notes

There are important technical notes which should be taken into consideration when reviewing this report:

- Tables exclude building licenses for those parts of Jerusalem annexed by Israel in 1967, while (J2) includes the remaining parts of the governorate.
- The details of the value of some indicators may not add up to their total due to the rounding of calculations.
- Governorates may not appear in some tables due to the unavailability of data.
- The zero value for the licenses area of some licenses was due to the rounding of calculation
