Acknowledgement

The Palestinian Central Bureau of Statistics (PCBS) extends its deep appreciations to all owners and managers of the hotels who contributed to the success of collecting the survey data and to all workers in the survey for being well dedicated in performing their duties.

The survey of Hotel Activities in the West Bank 2012, has been planned and conducted by a technical team from PCBS and with joint funding by State of Palestine and the Core Funding Group (CFG) for the year 2012 represented by the Representative Office of Norway to the State of Palestine and the Swiss Development and Cooperation Agency (SDC).

Moreover, PCBS very much appreciates the distinctive efforts of the Core Funding Group (CFG) for their valuable contribution to funding the project.

Introduction

Tourism is considered to be a cornerstone of the Palestinian economy and there are many attractive tourist sites for people of all interests. PCBS has collected statistical data on tourism and hotel activities through a continuous and thorough monthly survey since 1996, in accordance with the recommendations of the World Tourism Organization and European Union. The survey aims to produce a comprehensive database and time series of basic indicators on the hotel industry to enable the development and promotion of the tourism industry in the West Bank.

This report addresses the main indicators of the hotel industry. These indicators include the number of hotels in operation, the number of rooms and beds, public facilities in the surveyed hotels, the number of employees in hotels, the number of guest nights in the reference period, the number of guests by nationality, and bed and room occupancy rates.

PCBS is pleased to present the results of the survey on hotel activities in the West Bank for the year of 2012 as an important statistical reference. It is hoped that this information will pave the way to the development of a comprehensive tourism program in line with international standards and user needs.

April, 2013

PCBS of President**

Chapter One

Main Findings

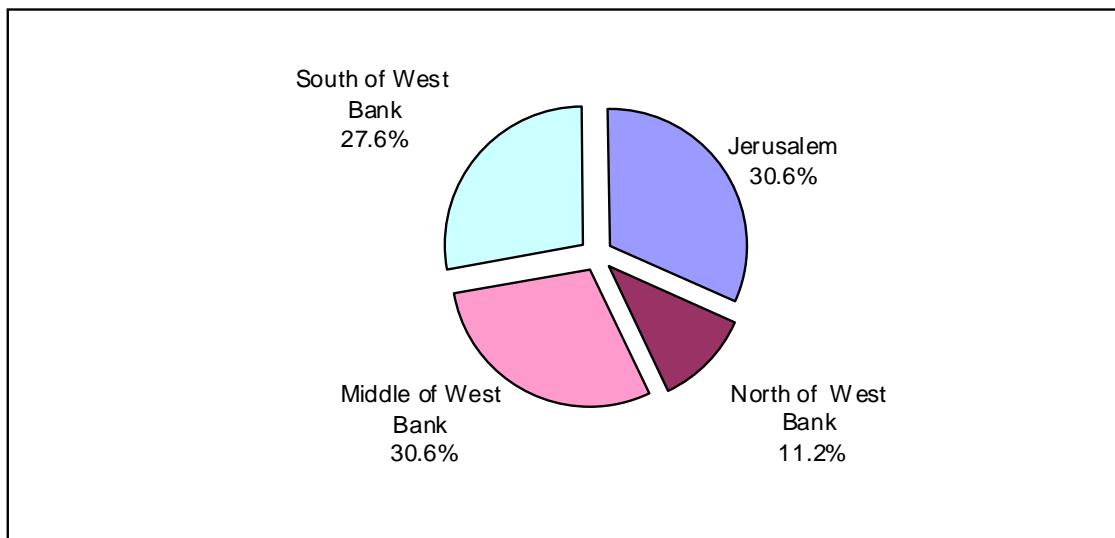

1.1 Distribution of Hotels in 2012

There were 105 hotels in total in the West Bank, including hotels closed for a temporary period. In December 2012, there were 98 hotels operating with a total annual average of 5,203 rooms and 11,883 beds.

The hotels operating in the West Bank were distributed as follows:

- North of West Bank: 11 hotels including 240 rooms with 666 beds.
- Middle of West Bank: 30 hotels including 1,333 rooms with 3,189 beds.
- Jerusalem: 30 hotels including 1,507 rooms with 3,292 beds.
- South of West Bank: 27 hotels including 2,123 rooms with 4,736 beds.

Percentage Distribution of Operating Hotels by Region as of December, 2012

1.2 Employment in 2012

There were 2,449 workers employed in hotels as follows:

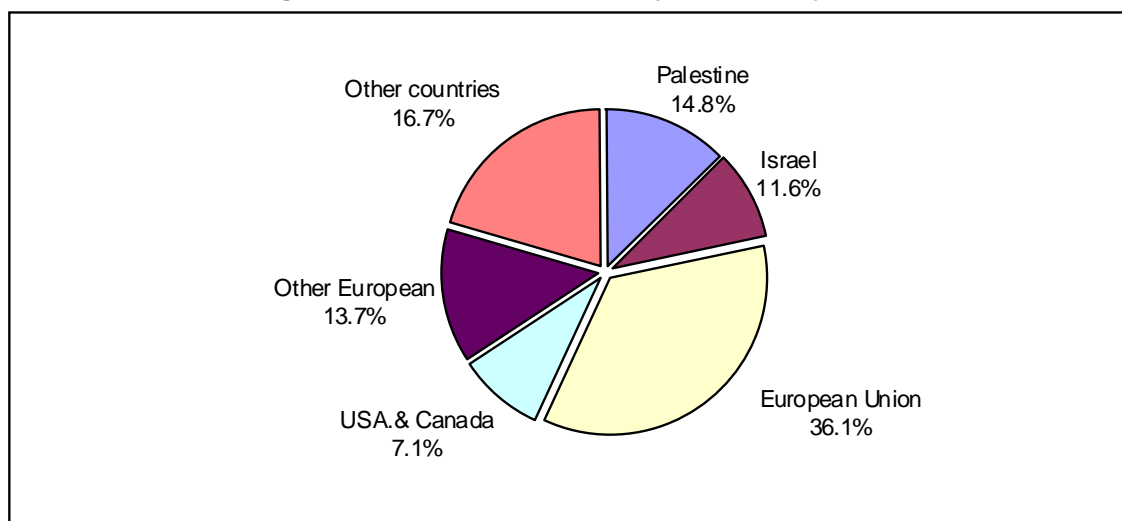

- 479 as administrative staff (338 males and 141 females).
- 1,970 as service workers (1,531 males and 439 females).

1.3 Number of Guests and Guest Nights in 2012

During 2012, the total number of guests in the West Bank hotels was 575,495, of whom 14.8% were Palestinian guests and 36.1% were from European Union countries.

The total number of guest nights in the West Bank hotels during 2012 was 1,336,860, of which 13.0% were Palestinian, 39.8% were guests from European Union countries and 8.0% were guests from the United States and Canada.

Percentage Distribution of Guests by Nationality, 2012

The number of guests and guest nights increased during 2012 by 13.4% and 7.3% respectively compared with 2011.

Main Indicators of the Hotel Activities, (2009-2012)

Indicator	2009	2010	2011	2012
Number of operating hotels	92	87	91	98
Average number of workers	1,514	1,692	2,091	2,449
Number of guests	451,840	576,159	507,372	575,495
Number of guest nights	1,041,246	1,283,178	1,245,509	1,336,860
Average occupancy of rooms	1,479.1	1,740.5	1,417.1	1,513.7
Average occupancy of beds	2,852.7	3,515.6	3,412.4	3,652.6
Percentage occupancy of rooms %	34.9	37.9	28.4	29.1
Percentage occupancy of beds %	30.7	35.3	31.9	30.7

Chapter Two

Methodology and Data Quality

2.2 Survey Objectives

By conducting this survey series, we aim to provide a regular flow of data on:

- Number of hotels in operation and their number of rooms and beds.
- Rooms and public facilities in the surveyed hotels.
- Number of hotel employees.
- Number of guest nights during the reference period.
- Number of guests by nationality.
- Bed occupancy and room occupancy rates.

2.3 Survey Questionnaire

The questionnaire was designed according to international standards and recommendations. The Higher Council for the Arab Tourist Industry and the Arab Studies Society both contributed to the questionnaire design to provide data on hotel identification, employees by type of work and sex, the number of rooms and beds, number of guests, their nationality, and room and bed occupancy.

2.4 Coverage

The frame of the survey was based on the Establishments Census conducted by PCBS in 2007. This frame undergoes continuous updating, adding newly-opened hotels and removing closed ones. Hotels which have ceased operations due to maintenance or repairs are not surveyed until they become functional again.

2.5 Field Work

The field workers recruited for the implementation of this survey were selected based on their experience in similar projects. Before being recruited, field workers undergo theoretical and practical training to enable them to carry out their duties properly. Field workers are trained in data collection, how to use the survey manual for concepts and definitions, interviewing and other tasks. Regular rounds of data collection are made to respondents, thus ensuring precision and the accuracy of data.

2.6 Office Work Activities

The completed questionnaires were delivered for office editing. Upon completion of data editing, the questionnaires underwent a process of verification and coding in accordance with the coding manuals.

2.7 Tabulation and Data Processing

After being edited, verified and coded, the data were captured electronically using a specially designed data entry program developed in accordance with pre-determined formats to fulfill all of the survey's objectives. Prior to initiating data entry, theoretical and practical training sessions are offered to data entry operators. The entered data undergoes electronic editing based on standard editing rules. In addition, random quality checks were undertaken to ensure error free data entry.

After completing data entry, editing and cleaning, statistical tables were produced according to the dissemination plan.

2.8 Data Quality

This includes ensuring relevance, accuracy, timeliness, punctuality, accessibility and clarity, comparability, coherence and completeness.

Comparability

Comparisons of the findings of this report with the previous quarterly results of the Hotel Activity Survey should show logical and consistent results.

Comparison between Quarterly Reports and Annual Bulletin of 2012

Some differences may be apparent in the results of the annual bulletin and those of the quarterly reports due to delays in receiving questionnaires from some hotels. The delayed data are included in the annual bulletin.

Comparison of the results of annual bulletin with quarterly reports, 2012

Quarter	No. of Hotels	Average No. of Rooms	Average No. of beds	No. of Guests	No. of Guests nights	
Annual bulletin	I	90	5,033	11,335	117,470	292,684
	II	87	5,119	11,726	159,254	371,563
	III	94	5,268	12,108	146,612	310,327
	IV	98	5,393	12,362	152,159	362,286
Quarterly reports	I	90	5,060	11,371	114,336	286,842
	II	86	4,835	11,136	157,036	369,171
	III	92	5,259	12,109	146,451	309,961
	IV	98	5,377	12,286	152,159	362,286

Response Rates

There were 105 hotels in the West Bank at the time of the annual report of 2012, of which 98 hotels responded. Responses were distributed as follows:

There were responses from 98 hotels.

There were 7 cases of non-response: one refusal to respond and two other replies.

The non-response percentage was 6.6%, with refusals making up only 0.9%.

Technical Notes

Any changes in the number of hotels, rooms and beds during 2012 were due to the following:

- A number of hotels were undergoing repair or maintenance and were not included in the findings presented in this report.
- Data include all establishments that conduct any type of hotel activity whether categorized or not.
- This publication disseminates indicators related to Jerusalem hotels separately from the Middle of West Bank region since Jerusalem has the largest number of hotels.
- Gaza Strip hotels are not included in this publication due to the inability of field workers there to collect data.

Chapter Three

Concepts and Definitions

This section presents the main concepts and definitions used to derive the main indicators of tourism statistics. These concepts and definitions are based on international recommendations in the field of tourism statistics, and are applied to the rest of the common subjects in the PCBS. The main concepts and definitions mentioned in this report were as follows:

Hotel:

It is defined as an accommodation establishment providing overnight lodging for the visitors in a room or unit. It should hold a number of persons exceeding that of an average single family. The establishment must be under one management, and provides various facilities and services to visitors.

Operating Hotels:

It is defined as the hotels that included in the sample frame and results, excluding the non operating hotels that are carrying out repairs or maintenance, and the hotels which didn't respond to the survey.

Number of Rooms:

It refers to the furnished rooms for the use of guests. Such rooms might be single, double, triple, or quadruple. Rooms involving more than four beds were classified under (others) in the questionnaire. As for the suite, it is usually comprised of one bedroom or more, a living room and private toilet facilities.

Available Beds and Rooms: (Indicator)

It refers to beds and rooms which are ready for use during the reference period. Rooms closed for maintenance or repairs are excluded.

Guests:

It refers to visitors staying in the hotels and using their facilities. Records of new guests are based on the number of visits regardless whether it's the same person or different.

Number of Guest Nights (Bed Occupancy): (Indicator)

Number of beds booked for hotel guests. Such beds are considered as occupied whether they were actually used or not. It is measured by guest night unit.

Room Occupancy: (Indicator)

Number of booked and paid rooms. Such rooms are considered occupied whether they were actually used or not.

Average (rooms, beds) Occupancy: (Indicator)

It is defined as the total number of occupied (rooms, beds) divided by the number of days.

Percentage of (rooms, beds) Occupancy: (Indicator)

It is defined as the average of (rooms, beds) occupancy divided by available (rooms, beds) multiplied by one hundred.

Average Length of Stay: (Indicator)

Represents the total of guest nights by nationality divided by number of guests of the same nationality.

North of West Bank:

Jenin, Tulkarm, Nablus, Qalqiliya, Salfit and Tubas governorates.

Middle of West Bank:

Ramallah and Al-Bireh, Jericho and Al-Aghwar governorates.

Jerusalem:

Jerusalem governorate.

South of West Bank:

Bethlehem and Hebron governorates.
