Notice to users of this report:

The PCBS would like to take the reader's attention that the data presented in this report are collected from a sample of households in the West Bank localities which the expansion and annexation wall passes through their land. The data reflect the socio-economic conditions of the households from their point of view. The survey frame consists from all localities that are affected by the wall up to the date of conduction survey.

Concepts and Definitions

Reference Period:	There are four reference periods in this survey: <ol style="list-style-type: none">1. Since the beginning of construction of the wall until the end of July 2005.2. Before and after building the wall.3. During the last month.4. During the last Week.
Locality:	A permanently inhabited place, with an independent municipal administration or other type of adopted administration.
Location from Expansion and Annexation Wall	Refers to the location place of the locality or land of the locality, or household from the wall:
1. Inside the Wall:	Includes all the localities located between the green line and the wall.
2. Outside the Wall:	Includes all the localities located outside the wall.
Area of Confiscated Lands:	The total area which was confiscated by Israeli occupation forces from the land of localities to construct the wall (usually taken by military order).
Humanitarian Aid:	Any cash real humanitarian aid, regardless of the source, that is received by households because of the deteriorating living conditions due to measures taken by Israeli occupation forces during the wall construction.

Press Release

On the Main Findings of the Survey on the Impact of the Expansion and Annexation Wall on the Social and Economical Conditions of the Palestinian Households in the Localities which the Wall Passes Through in the West Bank (August 2005)

42.3% of the households in the localities affected by the wall was confiscated their lands, 85.4% of the households depend on their monthly income, and 58.2% of the households report that the movement of female decreased

PCBS conducted a household survey in the Palestinian localities where the Expansion and Annexation wall passes through in the West Bank. The sample size was 3,445 households, while the sample size for completed questionnaires was 2,675 households, Data collection took place during August 2005, Knowing that the sample was drawn for this survey from the frame which was built from the localities survey which *covers 149 localities effected by the Wall up to the end of June 2005*. This survey comes as a part of the surveillance system to monitor the impact of the Israeli measures on the well being of the Palestinian people.

The Overall Trend of Indicators

The results of these survey rounds indicate that the negative effect of the wall and restrictions on the movements of individuals have been increased during 2004-2005. The percentage of individuals whom the time spent to pass has restricted their movement has been increased in the localities inside the wall from 90.0% in July 2004, to 91.2% in August 2005, while there are no changes in the localities outside the wall from 64.3% to 64.6% during the same period. The percentage of individuals that the time schedule for passage has restricted their movements in the localities inside the wall have been increased from 73.5% in July 2004, to 86.4% in August 2005, while there are no changes in localities outside the wall for the same period. The percentage of persons that the crossing needs special conditions (Permission, Some ID cards), has been increased in the localities inside the wall from 67.2% in July 2004, to 81.0% in August 2005, while in the localities outside the wall it decreased from 61.0% to 51.0% only during the same period.

The percentage of households or one of its member separated from their relatives has decreased also in the localities outside and inside the wall during 2003-2005.

The results indicate also that the household depends on the family income as the first source for living, and on reducing their expenditures then postponing paying bills, and the food constitute the first priority need for the households in the localities affected by wall.

The Effect of the Expansion and Annexation Wall and the Security Situation on the Education

The results revealed that 3.2% of the individuals in the localities affected by the wall left their education due to the security situation and the expansion and annexation wall, while it's noticed that 25.7% of the individuals in the affected localities left their education due to the bad economic conditions.

The results show that 88.9% of Palestinian households in the localities affected by the wall that have some members attending higher education used detour roads in order to reach their (universities and colleges) as a method of adaptation with the difficulties they face, and

69.1% of the households were forced to be absent from (university and college) due to the closure.

And the results show that 48.4% households that have some member attending (basic/secondary) education used detour roads in order to reach their schools as a method of adaptation with the difficulties they face comparison with 79.9% households that have some member attending (basic/secondary) education were forced to be absent from schools due to the closure.

Families Dissociation from Each Other and from Relatives

21.6% of Palestinian households or one of their individuals in the localities affected by the expansion and annexation wall have been separated from relatives (54.7% inside of the wall and 21.0% outside of the wall)

Separation from Health Services and Obstacles Against Movements and Transportation

The survey results indicated that 42.1% of the Palestinian households in the localities affected by the expansion and annexation wall indicated that separation from the health services (hospitals and medical centers) in the main cities formed an obstacle for them to get the required health services (79.0% inside of the wall, 41.1% outside of the wall). Also the disability of medical staff to reach the localities formed obstacle for 35.3% of the households (80.1% inside the wall, 34.4% outside the wall). and Lack of Medicines and Other Essential Medical Needs for 41.6% of the households (79.5% inside of the wall, 40.8% outside of the wall). Also Lack of Child Health Care Services for 31.4% of the households (64.7% inside of the wall, 30.8% outside of the wall).

Land Confiscation

The results revealed that the percentage of households whose lands were confiscated totally/partly was 42.3% of the households living in the localities affected directly by the expansion and annexation wall (49.6% inside of the wall, 42.2% outside of the wall).

Humanitarian Aid

Results show that 10.2% of households or one/some of their individuals in the localities affected by the wall reported that they received humanitarian assistance during August 2005.

Steadfastness Strategies

The results indicated that the households in the Palestinian localities affected by the wall depended on several methods to steadfast during the last six months, as 85.4% of the households reported that they depend on their monthly income (78.5% inside of the wall and 85.5% outside of the wall), where as 79.5% of households reduced there monthly expenditure (87.9% inside of the wall and 79.3% outside of the wall), and 64.5% delayed payment of bills (83.4% inside of the wall and 64.2% outside of the wall).

Income Sources

Results of the survey indicated that 60.9% of the Palestinian households in the Palestinian localities affected by the wall depended on Agriculture as a main income source before the construction of the wall, against 53.1% depend on this source after the construction of the wall, and 49.9% depended on wages and salaries from Israeli working sectors as a main income source before the construction of the wall, against 35.9% depend on this source after the construction of the wall, and 21.6% depended on Social assistance before the construction of the wall and 25.1% depend on the same source after the construction of the wall, and 20.3% of the Palestinian households in the Palestinian localities affected by the wall depended

on Household projects as a main income source before the construction of the wall, against 19.1% depend on this source after the construction of the wall

Priority Needs of Households

The results reveal that 49.6% of households in the localities affected by the expansion and annexation wall reported the need for work as top priority for their localities, and 22.1% of the households reported the need for improving the infrastructure in their localities as top priority for these localities, while 7.3% of households expressed the need for security and stability.

Concerning the needs of the households the results showed that 48.5% of the households in the localities affected by the expansion and annexation wall expressed the need for food as a top priority, and 24.3% of households expressed the need for money and jobs, and 12.2% of households expressed the need for education, while 9.0% of the households expressed the need for Treatments.

Effects of the Wall on the Family and Social Relationships

The results showed that 57.3% of households living in localities affected by the wall had their ability to visit relatives (85.5% inside the wall and 56.8% outside the wall), and 53.5% of households living in localities affected by the wall had their ability to practicing cultural and social activities (82.5% inside the wall and 52.9% outside the wall), The wall also affected the ability of households to visit religious and holy places at 80.4%, and 62.1% to practicing entertainment activities.

The survey results indicated that the percentage of households living in localities affected by the wall who have obstacles to marry a partner living in the other side of the wall raised from 13.8% before the construction of the wall to 53.0% after this construction.
