Important Notes

Statistics presented in this News Release is at constant prices, using 1997 as the base year for the period 1999-2003, while 2004 as the base year for the period 2004-2010.

Data related to the quarters of the year 2010 is preliminary estimates based on the available short-term indicators, taking into consideration that the final version of the Quarterly National Accounts will be issued after completing the necessary indicators.

Also, its worth mentioning that the unemployment rate in the Palestinian Territory for the 4th quarter of the year 2010 reached 23.4%, whereas it reached 26.6% during the 3rd quarter 2010 and 24.8% during the 4th quarter 2009. The unemployment rate for the year 2010 was 23.7%, 24.5% for the year 2009, while it was 26.0% for the year 2008.

The unemployment rate in West Bank for the 4th quarter of the year 2010 reached 16.9%, whereas it reached 20.1% during the 3rd quarter 2010 and 18.1% during the 4th quarter 2009. The unemployment rate in Gaza Strip for the 4th quarter of the year 2010 reached 37.4%, whereas it reached 40.5% during the 3rd quarter 2010 and 39.3% during the 4th quarter 2009.

The data related to Government (Education, Health in addition to the Public Administration and Defense) was valued using the Accrual Bases based on the recommendations of the System of National Accounts issued by the UN. Also, it's worth mentioning that the wages and salaries are obtained from the monthly report of the Ministry of Finance to estimate government's activities, taking into consideration that data pertaining to expenditures in the public budget was reclassified based on revised classifications using the latest revision of the Government Finance Statistics Manual 2001.

Considerable increases in the Value Added of Agriculture and Fishing Activity by 36.3%.

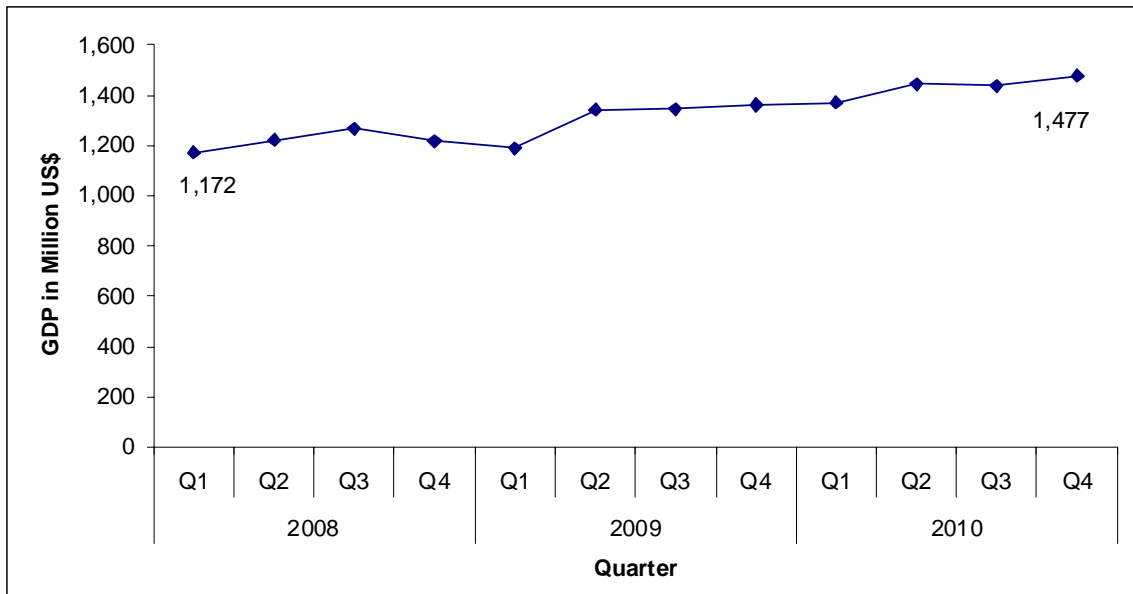

Comparing the 4th quarter with the 3rd quarter 2010,

The Value Added of Agriculture and Fishing activity increased by 36.3% in the Palestinian Territory*, while it decreased for construction by 5.6%.

Growth in the GDP in the Palestinian Territory* during the 4th quarter 2010 compared with the 3rd quarter 2010

The preliminary estimates at constant prices for the year 2010 showed an increase of 9.3% in the GDP in the Palestinian Territory* compared with year 2009, and showed an increase of 2.8% for the 4th quarter 2010 compared with the 3rd quarter 2010, whereas the estimates showed an increase of 8.5% compared with the 4th quarter 2009 at constant prices (the base year is 2004). As for the West Bank*, the GDP increased by 5.5% during the 4th quarter 2010 compared with the 3rd quarter 2010. As for the Gaza Strip, the GDP decreased by 5.2% during the 4th quarter 2010 compared with the 3rd quarter 2010. GDP for the 4th quarter 2010 at constant prices in the Palestinian Territory* was US\$ 1,477 million of which US\$ 1,137 million for the West Bank* and US\$ 340 million for the Gaza Strip.

GDP in the Palestinian Territory* for the years 2008-2010

Gross Domestic Product Per Capita

The Gross Domestic Product per Capita for the Palestinian Territory* during the 4th quarter 2010 was US\$ 383 with an increase by 2.0% compared with the 3rd quarter of the same year; while it showed an increase by 5.3% compared with the 4th quarter 2009.

* The data excludes those parts of Jerusalem which were annexed by Israel in 1967.

Performance of Main Economic Activities during the 4th quarter 2010 in the Palestinian Territory.

First: Growth in gross value added for the following economic activities:

- The **Agriculture** activity increased in its gross value added during the 4th quarter 2010 compared with the previous quarter of the same year by 36.3%, and it increased by 15.0% compared with the 4th quarter 2009.
- The gross value added for **Mining, Manufacturing, Water and Electricity** activities increased during the 4th quarter 2010 compared with the previous quarter of the same year by 5.1%, while it decreased by 10.4% compared with the 4th quarter 2009.
- The gross value added for **Wholesale and Retail Trade** activities increased during the 4th quarter 2010 compared with the previous quarter of the same year by 5.4%, and it increased by 12.2% compared with the 4th quarter 2009.
- The gross value added for **Transport, Storage and Communications** activities increased during the 4th quarter 2010 compared with the previous quarter of the same year by 4.3%, while it increased by 6.1% compared with the 4th quarter 2009.

Second: Decline in gross value added for the following economic activities:

- The gross value added for **Construction** activity decreased by 5.6% during the 4th quarter 2010 compared with the previous quarter of the same year, while it increased by 46.6% compared with the 4th quarter 2009.
- The gross value added for **Real Estate, Renting and Business Services** activities decreased by 2.8% during the 4th quarter 2010 compared with the previous quarter of the same year, while it increased by 9.0% compared with the 4th quarter 2009.
- The gross value added for **Public Administration and Defense activities** activities decreased by 1.0% during the 4th quarter 2010 compared with the previous quarter of the same year, while it increased by 0.9% compared with the 4th quarter 2009.

Concepts and Definitions

Statistical Unit

The United Nations System of National Accounts SNA 1993 defines two main types of statistical units:

- Institutional Unit-Enterprise

An institutional unit is an economic entity that is capable, in its own right, of owning assets, incurring liabilities and engaging in economic activities and in transactions with other entities.

- Establishment

An establishment is an enterprise, or part of an enterprise, which produces only a single group of goods (with the possibility of production from secondary activities) in which the principal productive activity accounts for most of the value added.

Breaking down institutional units into establishments serves to create more consistent statistical units in the productive sense.

Economic Activity

Is an activity, carried out under the responsibility, control and management of an institutional unit that uses inputs of labour, capital, goods and services to produce outputs.

Output

Value of goods and services, including own-account goods, produced during a specific period.

Value added

Value added is a central concept of production and refers to the generated value of any unit that carries out any productive activity. Gross value added is defined as the value of gross production less the value of intermediate consumption. The net value added is defined as the gross value less the value of fixed capital consumption. The net value added reflects the performance of the economy in a better way; however, since it is difficult to measure the fixed capital consumption accurately, the concept of gross value added is more frequently used.

Value added at producers' price is the difference between output at basic prices and the value of the intermediate consumption at purchase price plus taxes (less subsidies) on production. However, if taxes and subsidies are excluded, value added will be obtained in basic prices.

Gross Domestic Product (GDP)

Gross Domestic Product or GDP is the summary measure of the output or production during a certain period in time. Estimate of GDP, like the output and the value added, can vary according to taxes and subsidies taken into consideration that GDP is usually estimated at market prices, producers' prices, or basic prices.

Deflating

Changing all data at current prices to constant prices by choosing the suitable indices by which the effect of prices on the data will be isolated, and choosing suitable base year in order to do this.

Short-term indicators

All indicators that have a periodicity of less than a year, usually a month or quarter.

Industrial Production Index

A statistical tool used for measuring the change in volume of output of industrial activities during a certain period of time. The index uses the change in volume of production for the largest establishments in each industry.

Financial Intermediation Services Indirectly Measured (FISIM)

It refers to the total of property income payable to financial institution less the gross value of payable interests on these institutions excluding property income receivable by investment of money of the same institutions..
