Notes for Users

The following indicators were recommended by the 19th ICLS for measuring labour underutilization comprehensively:

- (1) Unemployment rate (LU1); the concept of the unemployed was narrowed to include only those who didn't work during the reference period, but sought seriously for work and have the willing and ability to work. People who didn't seek work during the last four weeks preceding the interview were excluded from the definition because they will start work in the near future (Waiting employers reply, have already made arrangements for self-employed, who are waiting for work permits to work in Israel and the Israeli settlements, or have already found work to start later), while they were previously included in the definition of the unemployed.
- (2) Combined rate of unemployment and underemployment (LU2);
- (3) Combined rate of unemployment and potential labour force (LU3), including discouraged jobseekers; and
- (4) Composite measure of labour underutilization (LU4); refers to the mismatches between labour supply and demand which include: 1. Unemployment rate 2. Time-related underemployment. 3. Potential labour force.

By adopting the latest standards and the full set of labour underutilization indicators, PCBS statistics will provide a more detailed picture of the different forms of labour underutilization in the Palestinian labour market. One important implication is that PCBS is now applying the strict unemployment measure called for in the 19th ICLS, 2013 resolution (LU1). Discouraged jobseekers – those persons classified as: (1) available for work; (2) not seeking work currently; and (3) having sought work during the past six months – are no longer included in PCBS unemployment estimates. This caused lower estimated unemployment and labour force participation rates. The other measures of labour underutilization listed above will be calculated and disseminated by PCBS alongside the strict LU1 unemployment rate in order to provide a more comprehensive view of different forms of labour underutilization in Palestine.

For the West Bank, adoption of the strict unemployment rate (LU1) measure caused only a small change in the unemployment estimate, while for Gaza Strip, there is a much larger change. The reason for the large difference in Gaza Strip is that discouragement is widespread – a large number of persons who were previously classified as unemployed are actually discouraged jobseekers. These individuals were previously seeking work and are still available to work, but are no longer actively seeking for a job. Large numbers of discouraged jobseekers in conjunction with a high rate of unemployment reflects the severe labour market distress in Gaza Strip. With little hope to find employment, many jobseekers are giving up on their search for work.

More than One-Quarter of Participants of Labour Force in the West Bank Became Unemployed in the 2nd Quarter of 2026

The number of employed persons from the West Bank in the 2nd quarter of 2026 increased by 33 thousands compared with the 1st quarter of 2026.

The number of employed persons from the West Bank (excluding those working abroad) increased from about 700 thousand in the 1st quarter of 2026 to about 733 thousand in the 2nd quarter of 2026, with a percentage of about 4.6%.

The number of employed persons in the local market in the West Bank increased by about 27 thousands between the 2nd and the 1st quarter of 2026

The number of employed persons in the local market in the West Bank increased from about 653 thousand employed persons in the 1st quarter of 2026 to 680 thousand employed persons in the 2nd quarter of 2026.

Results showed that the increase in the number of employed persons in the local market in the West Bank was due to the increase in the number of employed persons in Commerce, Restaurants and Hotels, followed by Construction activities, then Manufacturing activities.

The average daily wage for wage employees in the West Bank was 134.3 NIS, while the average weekly working hours was 41.6 hours per week. The average monthly working days was 22.4 working days.

About two-thirds of employed persons are wage employees

66.1% of employed persons are wage employees, 23.4% of employed persons are self-employed, 6.0% of employed persons are employers, and 4.5% are unpaid family members.

More than one-third of the wage employees in the private sector are hired without any employment contract.

42.1% of wage employees in the private sector are hired without any employment contract, and 35.5% of wage employees receive a contribution to their pension

fund/end of service compensation. Moreover, 49.8% of wage female employees received a paid maternity leave.

15.5% of wage employees in the private sector receive a monthly wage of less than the minimum wage level (1,880 NIS) in the West Bank

The percentage of wage employees in the private sector who receive a monthly wage less than the minimum wage level in the West Bank was 15.5% in the 2nd quarter of 2026 (about 41 thousand employees).

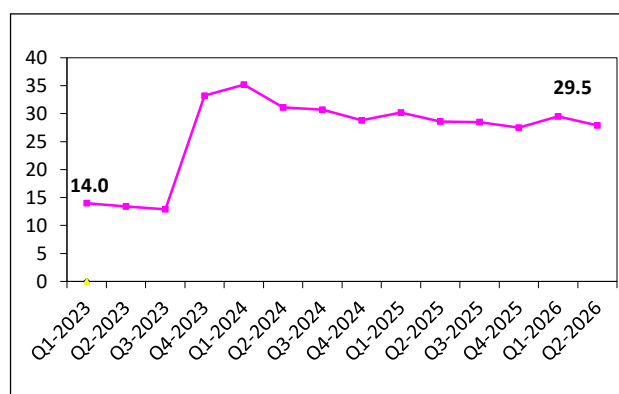

It is worth mentioning that the Council of Ministers issued a decree stating that the minimum wage is to be (1,880 NIS) as of the beginning of 2022.

The average monthly wage for those who receive less than the minimum wage in the West Bank was 1,455 NIS.

More than one quarter of the labour force participants were unemployed in the West Bank in the 2nd quarter of 2026

The unemployment rate among labour force participants (15 years and above) in the 2nd quarter of 2026 was 27.9%, while the total underutilization of labour was about 29.9%. According to the International Labour Organization Standards (ICLS-19th), the unemployment rate among males in the West Bank reached 27.2%, compared to 30.5% for females.

Unemployment Rate (ICLS 19th) in the West Bank, Q1- 2023 – Q2-2026

The number of unemployed persons in the West Bank reached about 284 thousand in the 2nd quarter of 2026 (27.9%) compared to about 294 thousand in the 1st quarter of 2026 (29.5%).

The number of participants in the labour force was 1.018 million in the 2nd quarter 2026, the percent was 44.9% in the 2nd quarter of 2026 compared to 44.2% in the 1st quarter of 2026.

Labor force participation rate among males in the West Bank reached 71.0% in the 2nd quarter of 2026 compared to 70.1% in the 1st quarter of 2026. Also participation rate among females reached 17.9% in the 2nd quarter 2026 compared to 17.5% in the 1st quarter of 2025.

Within the same context, the total of labour underutilization reached 310 thousand persons.

Unemployment rate was the highest among youth graduates with an intermediate diploma certificate and higher

About 38.3% is the unemployment rate among youth graduates (aged 19-29 years) with intermediate diploma certificate and higher in the West Bank; 23.1% among males compared to 51.2% among females.

53 thousand employed individuals in Israel and Israeli settlements in the 2nd quarter of 2026

The number of employed persons from the West Bank in Israel and Israeli settlements was about 53 thousand in the 2nd quarter 2026 compared to 48 thousand in the 1st quarter of 2026, where the total number of employed persons in Israel was about 35 thousand in the 2nd quarter 2026 compared to 30 thousand in the 1st quarter of 2026, while the number of workers in Israeli settlements stayed at the same level about 17,600 in the same period.

The average daily wage for wage employees in Israel and Israeli settlements was 263.4 NIS in the 2nd quarter of 2026, compared to 287.1 NIS in the 1st quarter of 2026.

Concepts and Definitions

Population of Working Age:

All persons aged 15 years and above.

Reference Period:

The week ending on Friday preceding the interviewer's visit to the household.

Labour Force:

All persons aged 15 years and above who are either employed or unemployed.

Employed:

Persons aged 15 years and over who were at work at least one hour during the reference period, or who were not at work during the reference period, but held a job or owned business from which they were temporarily absent (because of illness, vacation, temporarily stoppage, or any other reason) he\ she was employed, unpaid family member or other. The employed person is normally classified in one of two categories according to the number of weekly work hours, i.e. 1-14 work hours and 15 work hours and above. Also the absence due to sick leave, vacation, temporarily stoppage, or any other reason. Employed persons are classified according to employment status as follows:

1. Employer
2. Self-employed
3. Paid- employed (wage employee)
4. Unpaid family member

Time related underemployment:

All persons who were employed during a short reference period and the total actual hours worked in all jobs were less than 35 hours and they wanted to work additional hours, who were available to work additional hours if they given an opportunity for additional work.

Unemployed (ILO Standards ICLS-19th):

Unemployed persons are those individuals aged 15 years and above who did not work at all during the reference period, who were not absent from a job, were available for work and actively seeking a job during the Last four weeks by one of the following methods news paper, registered at employment office, ask friends or relatives or any other method, where Discouraged jobseekers – those persons classified as: (1) available for work; (2) not currently seeking work; and (3) having sought work during the past six months are excluded.

Discouraged jobseekers:

All persons aged 15 years and above who during the reference period were currently available but did not carry out activities to seek employment in the last four weeks because they sought for employment in the last six months and were discouraged to finding a job.

Potential labour force:

All persons aged 15 years and above who are during the reference period were neither in employment nor in unemployment were considered as either:

1. Unavailable jobseekers:
All persons aged 15 years and above who during the reference period carried out activities to seek employment were not currently available.
2. Available potential jobseekers:
All persons aged 15 years and above who during the reference period were currently available but did not carry out activities to seek employment.
3. Willing potential jobseekers:

All persons aged 15 years and above who during the reference period did not carry out activities to seek employment and were not currently available but want employment.

Labour underutilization:

Refers to mismatches between labour supply and demand which include:

1. Unemployment rate
2. Time- related underemployment
3. Potential labour force

Individuals Outside Labour Force:

The individuals not economically active comprises all persons 15 years and above, who were neither employed nor unemployed accordingly to the definitions over. Because they don't have any desire to work or because of the availability of another source of income.

Unpaid trainee:

The person who performed any unpaid work to produce goods and services for others, in order to acquire experience or skills in the workplace in order to be able to find jobs, transportation or allowance or meals or gifts that offered to trainee are not considered as wage

Own-use production:

The person who performed any activity to produce goods or provide services for own final consumption or for his/ her family consumption, including producing or processing for storage agricultural, fishing, hunting and gathering products, and manufacturing household goods (clothing, food, and furniture).

Volunteer work:

The person in volunteer work are who performed any unpaid activity, non compulsory activity to produce goods or provide services for others, it includes work done through, or for, self help, mutual aid or community based groups of which volunteer is a member, which transportation allowance or meals or gifts that offered to volunteer are not considered as wage, and unpaid work required as part of education or training programmers are excluded from volunteer work
