Revision to Palestine's labour underutilization statistics

Following ILO technical assessment mission in 2018, the PCBS implemented revisions to the concepts and definitions underpinning labour underutilization statistics, which the PCBS will release as of the first quarter of 2019. These methodological changes were carried out in order to bring PCBS statistics fully in line with the latest international standards pertaining to labour underutilization statistics, established by the 19th International Conference of Labour Statisticians (ICLS, 2013). The following indicators were recommended by the 19th ICLS for measuring labour underutilization comprehensively:

- (1) Unemployment rate (LU1); the concept of the unemployed was narrowed to include only those who didn't work during the reference period, seek seriously for work and have welling and ability to work. The people who didn't seek work during the last four weeks preceding the interview were excluded from the definition because they will start work in the near future, (Waiting employers reply, have already made arrangements for self-employed, who are waiting for work permits to work in Israel and the Israeli settlements, or have already found work to start later), while previously they were included in the definition of the unemployed. (2) Combined rate of revised unemployment and underemployment (LU2);
- (3) Combined rate of revised unemployment and potential labour force (LU3), including discouraged jobseekers; and
- (4) Composite measure of labour underutilization (LU4); Refers to the mismatches between labour supply and demand which include: 1. Unemployment rate 2.Time- related underemployment. 3. Potential labour force.

By adopting the latest standards and the full set of labour underutilization indicators, PCBS statistics will provide a more detailed picture of the different forms of labour underutilization in the Palestinian labour market. One important implication is that the PCBS is now applying the strict unemployment measure called for in the 19th ICLS, 2013 resolution (LU1). Discouraged jobseekers – those persons classified as: (1) available for work; (2) not currently seeking work; and (3) having sought work during the past six months – are no longer included in PCBS unemployment estimates. This results in lower estimated unemployment and labour force participation rates. The other measures of labour underutilization listed above will be calculated and disseminated by the PCBS alongside the strict LU1 unemployment rate in order to provide a more comprehensive view of different forms of labour underutilization in Palestine.

For the West Bank, adoption of the strict unemployment rate (LU1) measure results in only a small change in the unemployment estimate, while for Gaza Strip, there is a much larger change. The reason for the large difference in Gaza Strip is that discouragement is widespread – a large number of persons who were previously classified as unemployed are actually discouraged jobseekers. These individuals were previously seeking work and are still available to work, but are no longer actively seeking for a job. Large numbers of discouraged jobseekers in conjunction with a high rate of unemployment reflects the severe labour market distress in Gaza. With little hope to find employment, many jobseekers are giving up on their search for work.

The Impact of the Coronavirus Pandemic on the Labour Market

The labour market is considered the most affected sector during the ongoing Coronavirus pandemic since the beginning of March 2020, as the Palestinian government has taken several measures in addition to an emergency plan to limit the outbreak of the pandemic. Thus, the data below reflects the most important indicators of the Palestinian labour market during the 4th quarter of 2020 as follows:.

The number of employed persons decreased by one thousand in the 1st quarter of 2021

The number of employed persons (excluded workers abroad) decreased from 995 thousand in the 4th quarter of 2020 to 994 thousand in the 1st quarter of 2021, by 1% compared to the 4th quarter of 2020. It decreased in the West Bank by 3.5% compared to the 4th quarter 2020, while it increased by 11.6% in Gaza Strip for the same period.

The largest decreased reported among wage employees, as this number decreased by 23 thousand employed persons, as for other employed persons, the number has increased between the 4th quarter 2021 and 1st quarter 2021 by 12 thousand for own account employed (employers and self employed), also it increased by 10 thousand for unpaid family workers.

Slight Increase in employed persons who were absent from their work due to the pandemic

The results showed that the number of employed persons who were absent from their jobs increased from 61 thousand in the 4th quarter 2020 to 62 thousand in 1st quarter 2021 with an increase by 1%. The reasons for this increase was due to Corona pandemic and return back gradually to closure especially in March 2021.

An increase in the number of employed persons in the local market between the 4th quarter 2020 and 1st quarter 2021

The number of employed persons in the local market increased from 853 thousand employed persons in the 4th quarter of 2020 to 856 thousand employed persons in the 1st quarter of 2021, this increase was 11.6% in Gaza Strip, while it decreased about 3.5% in the West Bank for the same period.

The results showed that most of the activities witnessed an increase in the number of employed persons during the 4th quarter of 2020 are those employed in other services¹, constructions, then manufacturing, agriculture and transportation, but trade commerce and hotels sector witnessed a decrease in the number of employed persons.

The average weekly working hours for wage employees in the West Bank was 42.4 hours per week compared to 35.9 hours in Gaza Strip. The average monthly working days was 22.5 working days in the West Bank compared to 21.9 working days in Gaza Strip.

A decrease in the number of employed persons in Israel and Israeli settlements by 4 thousands between the 4th 2020 and the 1st quarter of 2021

The number of employed persons in Israel and settlements decreased from about thousand employed persons in the 4th quarter 2020 to 138 thousand employed persons in the 1st quarter of 2021; the highest decrease was in the number of workers in manufacturing by thousands followed by commerce, restaurants and hotels and constructions by one thousand for each of them. While the number of employed persons in Israeli settlements increased from 20 thousand in the 4th quarter 2020 to 21 thousand in the 1st quarter 2021.

The average daily wage for the wage employees in Israel and Israeli settlements

membership organizations, Other personal service activities, Activities of households as employers of domestic personnel and Activities of extraterritorial organizations and bodies

¹ Includes: Public administration and defence; compulsory social security, Education, Human health activities, Social work activities without accommodation, Creative, arts and entertainment activities, Libraries, archives, museums and other cultural activities, Sports activities and amusement and recreation activities, Activities of

increased between the 4th quarter 2020 and the 1st quarter 2021 from 261 NIS to 264 NIS.

7 out of 10 employed persons are wage employees

72% of employed persons are wage employees, 24% of employed persons are self-employed and employers, and 4% are unpaid family members.

About half of the wage employees in the private sector were hired without any contract.

51% of wage employees in the private sector were hired without any contract, and 32% of wage employees receive a contribution to a pension fund/end of service compensation. Moreover, more than half of wage female employees (59%) have a paid maternity leave.

29% of wage employees in the private sector receive less than the minimum wage (1,450 NIS) in Palestine

The percentage of wage employees in the private sector who receive less than the minimum wage in the West Bank increased slightly between the 4th quarter 2020 and the 1st quarter 2021 from 6% to 7%, (The number increased from 17 thousand to 18 thousand), and also the percentage increased from 79% to about 81% in Gaza Strip (The number increased from 68 thousand to 85 thousand) during the same period.

The monthly minimum wage in Gaza Strip was (655 NIS) compared with (1,114 NIS) in the West Bank.

An increase in the labour force participation rate in Gaza Strip

The participation rate in the labour force increased from 41% in the 4th quarter 2020 to 43% in the 1st quarter 2021. Also, data indicated that this percentage increased in Gaza Strip from 32% to 39%, while it remains at the same level in the West Bank at 46% during the same period.

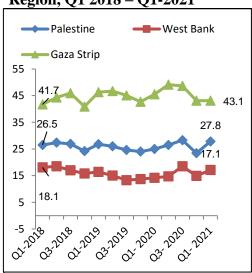

The male participation rate increased from 65% in the 4th quarter of 2021 to 69% in the 1st quarter 2021, while for females it remains at the same level 16% during the same period.

This explains why the unemployment rates increased this quarter, where was the number of the labour force participants increased about 78 thousand while the increase in the number of employed was about one thousand, so the increasing in the number of employed persons was less than the increasing in the number pf participants, so decreasing number of unemployed persons, which lead the increase in the number of unemployed, the unemployment rate in the 1st 2021 quarter was about 28%, while the total underutilisation of labour was about 36%, according to the revised International Labour Organization standards (ICLS-19th).

The number of unemployed persons reached 383 thousand in the 1st quarter of 2021; of which 228 thousand persons in Gaza Strip and 155 thousand persons in the West Bank. Hence, the disparity remains large in the unemployment rate between the West Bank and Gaza Strip, as this rate reached 48% in Gaza Strip compared to 17% in the West Bank. As for the sex level, the unemployment rate for males in Palestine reached 24% compared to 43% for females.

Within the same context, the total underutilisation reached 550 thousand persons, as this number includes 84 thousand discouraged job seekers and 30 thousand in time-related underemployment.

Unemployment Rate (ICLS 19th) by Region, Q1 2018 – Q1-2021

Concepts and Definitions

Population of Working Age:

All persons aged 15 years and above.

Reference Period:

The week ending on Friday preceding the interviewer's visit to the household.

Labour Force:

All persons aged 15 years and above who are either employed or unemployed.

Employed:

Persons aged 15 years and over who were at work at least one hour during the reference period, or who were not at work during the reference period, but held a job or owned business from which they were temporarily absent (because of illness, vacation, temporarily stoppage, or any other reason) he\ she was employed, unpaid family member or other. The employed person is normally classified in one of two categories according to the number of weekly work hours, i.e. 1-14 work hours and 15 work hours and above. Also the absence due to sick leave, vacation, temporarily stoppage, or any other reason. Employed persons are classified according to employment status as follows:

1.Employer

2.Self-employed

3. Paid- employed (wage employee)

4. Unpaid family member

Time related underemployment:

All persons who were employed during a short reference period and the total actual hours worked in all jobs were less than 35 hours and they wanted to work additional hours, who were available to work additional hours if they given an opportunity for additional work.

Unemployed (Revised ILO Standards ICLS-19th):

Unemployed persons are those individuals aged 15 years and above who did not work at all during the reference period, who were not absent from a job, were available for work and actively seeking a job during the Last four weeks by one of the following methods news paper, registered at employment office, ask friends or relatives or any other method, where Discouraged jobseekers – those persons classified as: (1) available for work; (2) not currently seeking work; and (3) having sought work during the past six months are excluded.

Discouraged jobseekers:

All persons aged 15 years and above who during the reference period were currently available but did not carry out activities to seek employment in the last four weeks because they sought for employment in the last six months and were discouraged to finding a job.

Potential labour force:

All persons aged 15 years and above who during the reference period were neither in employment nor in unemployment were considered as either:

- 1. Unavailable jobseekers:
 - All persons aged 15 years and above who during the reference period carried out activities to seek employment were not currently available.
- 2. Available potential jobseekers:
 - All persons aged 15 years and above who during the reference period were currently available but did not carry out activities to seek employment.
- 3. Willing potential jobseekers:

All persons aged 15 years and above who during the reference period did not carry out activities to seek employment and were not currently available but want employment.

Labour underutilization:

Refers to mismatches between labour supply and demand which include:

- 1. Unemployment rate
- 2. Time- related underemployment
- 3. Potential labour force

Individuals Outside Labour Force:

The individuals not economically active comprises all persons 15 years and above, who were neither employed nor unemployed accordingly to the definitions over. Because they don't have any desire to work or because of the availability of another source of income.

Unpaid trainee:

The person who performed any unpaid work to produce goods and services for others, in order to acquire experience or skills in the workplace in order to be able to find jobs, transportation or allowance or meals or gifts that offered to trainee are not considered as wage

Own-use production:

The person who performed any activity to produce goods or provide services for own final consumption or for his/ her family consumption, including producing or processing for storage agricultural, fishing, hunting and gathering products, and manufacturing household goods (clothing, food, and furniture).

Volunteer work:

The person in volunteer work are who performed any unpaid activity, non compulsory activity to produce goods or provide services for others, it includes work done through, or for, self help, mutual aid or community based groups of which volunteer is a member, which transportation allowance or meals or gifts that offered to volunteer are not considered as wage, and unpaid work required as part of education or training programmers are excluded from volunteer work
