Revision to Palestine's labour underutilization statistics

Following ILO technical assessment mission in 2018, the PCBS implemented revisions to the concepts and definitions underpinning labour underutilization statistics, which the PCBS will release as of the first quarter of 2019. These methodological changes were carried out in order to bring PCBS statistics fully in line with the latest international standards pertaining to labour underutilization statistics, established by the 19th International Conference of Labour Statisticians (ICLS, 2013). The following indicators were recommended by the 19th ICLS for measuring labour underutilization comprehensively:

- (1) Unemployment rate (LU1); the concept of the unemployed was narrowed to include only those who didn't work during the reference period, seek seriously for work and have welling and ability to work. The people who didn't seek work during the last four weeks preceding the interview were excluded from the definition because they will start work in the near future, (Waiting employers reply, have already made arrangements for self-employed, who are waiting for work permits to work in Israel and the Israeli settlements, or have already found work to start later), while previously they were included in the definition of the unemployed. (2) Combined rate of revised unemployment and underemployment (LU2);
- (3) Combined rate of revised unemployment and potential labour force (LU3), including discouraged jobseekers; and
- (4) Composite measure of labour underutilization (LU4); Refers to the mismatches between labour supply and demand which include: 1. Unemployment rate 2.Time- related underemployment. 3. Potential labour force.

By adopting the latest standards and the full set of labour underutilization indicators, PCBS statistics will provide a more detailed picture of the different forms of labour underutilization in the Palestinian labour market. One important implication is that the PCBS is now applying the strict unemployment measure called for in the 19th ICLS, 2013 resolution (LU1). Discouraged jobseekers – those persons classified as: (1) available for work; (2) not currently seeking work; and (3) having sought work during the past six months – are no longer included in PCBS unemployment estimates. This results in lower estimated unemployment and labour force participation rates. The other measures of labour underutilization listed above will be calculated and disseminated by the PCBS alongside the strict LU1 unemployment rate in order to provide a more comprehensive view of different forms of labour underutilization in Palestine.

For the West Bank, adoption of the strict unemployment rate (LU1) measure results in only a small change in the unemployment estimate, while for Gaza Strip, there is a much larger change. The reason for the large difference in Gaza Strip is that discouragement is widespread – a large number of persons who were previously classified as unemployed are actually discouraged jobseekers. These individuals were previously seeking work and are still available to work, but are no longer actively seeking for a job. Large numbers of discouraged jobseekers in conjunction with a high rate of unemployment reflects the severe labour market distress in Gaza. With little hope to find employment, many jobseekers are giving up on their search for work.

The Impact of the Coronavirus Pandemic on the Labour Market

The labour market is considered the most affected sector during the ongoing Coronavirus pandemic since the beginning of March 2020, as the Palestinian government has taken several measures in addition to an emergency plan to limit the outbreak of the pandemic. Thus, the report below reflects the most important indicators of the Palestinian labour market during the 3rd quarter of 2020 as follows:.

The number of employed persons increased by 46 thousand in the 3rd quarter of 2020

The number of employed persons increased from 890 thousand in the 2nd quarter of 2020 to 936 thousand in the 3rd quarter of 2020, by 5% compared to the 2nd quarter of 2020. It increased in Gaza Strip by 5% compared to the 2nd quarter 2020, also it increased by 6% in the West Bank for the same period.

The largest increase reported among employers and self employed, as this number increased by 27 thousand employed persons, followed by the number of wage employees, which increased by about 25 thousand between the 2nd and 3rd quarters of 2020, while the number of employed persons as unpaid family members decreased from 45 thousand to 39 thousand during the same period.

13% of employed persons were absent from their jobs during the 3^{rd} quarter of 2020 due to the pandemic

The results showed that the number of employed persons who were absent from their jobs decreased from 268 thousand in the 2nd quarter 2020 to 119 thousand in 3rd quarter 2020 by 56%. The reasons of this percentage is due to reducing measures of the Corona pandemic and gradually returning to work in the workplace recently.

An increase in the number of employed persons in the local market between the 2^{nd} and 3^{rd} quarters of 2020

The number of employed persons in the local market increased from 788 thousand employed persons in the 2nd quarter of 2020 to

804 thousand employed persons in the 3rd quarter of 2020, where it increased by 4% in Gaza Strip and increased by 1% in the West Bank for the same period.

The results showed that most of the activities witnessed an increase in the number of employed persons during the 3rd quarter of 2020 are those employed in restaurants, hotels, commerce and construction activities, then the services sector, but the other activities witnessed a decrease in the number of employed persons.

The average weekly working hours for wage employees in the West Bank was 43.2 hours per week compared to 34.9 hours in Gaza Strip. The average monthly working days was 22.6 working days in the West Bank compared to 22.4 working days in Gaza Strip.

An increase in the number of employed persons in Israel and Israeli settlements by 30 thousand between the 2^{nd} and the 3^{rd} quarters of 2020

The number of employed persons in Israel and settlements increased from about 102 thousand employed persons in the 2nd quarter of 2020 to 132 thousand employed persons in the 3rd quarter of 2020; this increase is due to reducing the measures taken to limit the outbreak of the Corona virus, where the highest increase was in the number of workers in constructions sector by 21 thousand employed persons followed by Commerce and industrial sectors, 7 thousand and 2 thousand employed persons respectively. The number of employed persons in Israeli settlements increased from 13 thousand in the 2nd quarter 2020 to 19 thousand in the 3rd quarter 2020.

The average daily wage for the wage employees in Israel and Israeli settlements increased between the 2nd quarter 2020 and the 3rd quarter 2020 from 249 NIS to 254 NIS respectively.

7 out of 10 employed persons are wage employees

70% of employed persons are wage employees, 26% of employed persons are self-employed and employers, and 4% are unpaid family members.

About half of the wage employees in the private sector were hired without any contract.

49% of wage employees in the private sector were hired without any contract, and 33% of wage employees receive a contribution to a pension fund/end of service compensation. Moreover, more than half of wage female employees (60%) have a paid maternity leave.

27% of wage employees in the private sector received less than the minimum wage (1,450 NIS) in Palestine

The percentage of wage employees in the private sector who received less than the minimum wage in the West Bank decreased from 8% in the 2nd quarter 2020 to 6% in the 3rd quarter 2020, (The number increased from 11 thousand to14 thousand), while the percentage increased slightly from 82% to about 84% in Gaza Strip (The number decreased from 65 thousand to 64 thousand) during the same period.

The monthly minimum wage in Gaza Strip was (678 NIS) compared with (1,065 NIS) in the West Bank.

An increase in the labour force participation

The reducing of measures imposed due to the COVID-19 pandemic led to return of individuals aged 15 years and above to the labour market, which positively affected the participation rate in the labour force, as it increased to 41% in the 3rd quarter compared to 39% in the 2nd quarter 2020. Also, data indicated that this percentage increased from 41% to 45% in the West Bank, while it remains almost at the same level 35% in Gaza Strip during the same period.

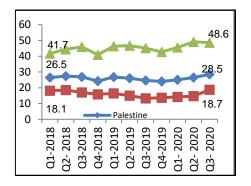

The male participation rate increased from 61% in the 2nd quarter of 2020 to 67% in the

3rd quarter 2020, and for females it remains at the same level 15% during the same period. This explains why unemployment rates increased slightly this quarter, as the increasing in the labour force participation was about 95 thousand while the increase in the number of employed was about 46 thousand, so the remaining will be an increase in the number of unemployed, unemployment rate among labour force participants (15 years and over) in the 3rd quarter was about 29%, while the total underemployment of labour was about 38%, according to the revised International Labour Organization standards (ICLS-19th).

The number of unemployed persons reached 373 thousand in the 3rd quarter of 2020; of which 208 thousand persons in Gaza Strip and 165 thousand persons in the West Bank. Hence, the disparity remains large in the unemployment rate between the West Bank and Gaza Strip, as this rate reached 49% in Gaza Strip compared to 19% in the West Bank. As for the sex level, the unemployment rate for males in Palestine reached 25% compared to 44% for females.

Within the same context, the total underutilisation reached 565 thousand persons, as this number includes 105 thousand discouraged job seekers and 17 thousand in time-related underemployment.

Unemployment Rate (ICLS 19th) by Region, 1st Quarter of 2018 – Q3-2020

Concepts and Definitions

Population of Working Age:

All persons aged 15 years and above.

Reference Period:

The week ending on Friday preceding the interviewer's visit to the household.

Labour Force:

All persons aged 15 years and above who are either employed or unemployed.

Employed:

Persons aged 15 years and over who were at work at least one hour during the reference period, or who were not at work during the reference period, but held a job or owned business from which they were temporarily absent (because of illness, vacation, temporarily stoppage, or any other reason) he\ she was employed, unpaid family member or other. The employed person is normally classified in one of two categories according to the number of weekly work hours, i.e. 1-14 work hours and 15 work hours and above. Also the absence due to sick leave, vacation, temporarily stoppage, or any other reason. Employed persons are classified according to employment status as follows:

1.Employer

2.Self-employed

3. Paid- employed (wage employee)

4. Unpaid family member

Time related underemployment:

All persons who were employed during a short reference period and the total actual hours worked in all jobs were less than 35 hours and they wanted to work additional hours, who were available to work additional hours if they given an opportunity for additional work.

Unemployed (Revised ILO Standards ICLS-19th):

Unemployed persons are those individuals aged 15 years and above who did not work at all during the reference period, who were not absent from a job, were available for work and actively seeking a job during the Last four weeks by one of the following methods news paper, registered at employment office, ask friends or relatives or any other method, where Discouraged jobseekers – those persons classified as: (1) available for work; (2) not currently seeking work; and (3) having sought work during the past six months are excluded.

Discouraged jobseekers:

All persons aged 15 years and above who during the reference period were currently available but did not carry out activities to seek employment in the last four weeks because they sought for employment in the last six months and were discouraged to finding a job.

Potential labour force:

All persons aged 15 years and above who during the reference period were neither in employment nor in unemployment were considered as either:

- 1. Unavailable jobseekers:
 - All persons aged 15 years and above who during the reference period carried out activities to seek employment were not currently available.
- 2. Available potential jobseekers:
 - All persons aged 15 years and above who during the reference period were currently available but did not carry out activities to seek employment.
- 3. Willing potential jobseekers:

All persons aged 15 years and above who during the reference period did not carry out activities to seek employment and were not currently available but want employment.

Labour underutilization:

Refers to mismatches between labour supply and demand which include:

- 1. Unemployment rate
- 2. Time- related underemployment
- 3. Potential labour force

Individuals Outside Labour Force:

The individuals not economically active comprises all persons 15 years and above, who were neither employed nor unemployed accordingly to the definitions over. Because they don't have any desire to work or because of the availability of another source of income.

Unpaid trainee:

The person who performed any unpaid work to produce goods and services for others, in order to acquire experience or skills in the workplace in order to be able to find jobs, transportation or allowance or meals or gifts that offered to trainee are not considered as wage

Own-use production:

The person who performed any activity to produce goods or provide services for own final consumption or for his/ her family consumption, including producing or processing for storage agricultural, fishing, hunting and gathering products, and manufacturing household goods (clothing, food, and furniture).

Volunteer work:

The person in volunteer work are who performed any unpaid activity, non compulsory activity to produce goods or provide services for others, it includes work done through, or for, self help, mutual aid or community based groups of which volunteer is a member, which transportation allowance or meals or gifts that offered to volunteer are not considered as wage, and unpaid work required as part of education or training programmers are excluded from volunteer work

Note:

ملاحظة:

^{*:} Workers in Israel and Settlements are excluded

Q: Quarter, Example: Q1-2017 means: First Quarter of 2017

⁽⁻⁾ in tables means observations are too small.

^{*:} لا يشمل العاملين من فلسطين في إسرائيل والمستعمرات

Q: تعني الربع من السنة، فمثلاً: Q1-2017 تعني الربع الأول من عام 2017

 ⁽⁻⁾ تعني عدم وجود عدد كافي من المشاهدات.
